

TRAVEL IN AUSTRIA

UNDERSTANDING THE
AUSTRIAN TOLL

WHY CHOOSE THE
TRIBOX AIR ?

EUROTOLL ADVANTAGES

TRAVEL IN AUSTRIA

THE AUSTRIAN NETWORK

The Austrian toll network was launched in 2004 and covers [over 2,100 km of highways and motorways](#). This free-flow network (no toll gates) uses the DSRC technology thanks to gantries.

To be compliant, [all vehicles over 3.5 tons](#) must be equipped with an On Board Unit (OBU) to be able to pay the toll. The toll [amount depends on the distance driven, the euro class of the vehicle and the number of axles](#). There are also a few lump sum sections (bridges, tunnels, city bypasses etc). Moreover, in order to fight against noise pollution, a night surcharge has been implemented in January 2017.

HOW DOES THE OBU WORK?

While circulating on the Austrian toll network, it is important that you pay attention to the behaviour of your OBU. The Austrian standards actually state that your OBU has to emit one or more sounds for each transaction. For security reasons, the [eurotoll tribox Air also displays messages on screen that confirm the meaning of the sounds](#).

- 1 beep : transaction OK, everything is in order,
- 2 beeps : your OBU needs to be updated,
- 4 beeps : your OBU is not working properly.

Therefore, in case there is any issue regarding the transmission of your transactions, you get real-time information and you can contact our Customer Service immediately to avoid any non-compliance situation.

WHY CHOOSE THE TRIBOX AIR ?

TRAVEL FREELY IN 5 COUNTRIES

Already usable in France, Spain, Portugal, and Belgium (Tunnel and Viapass), the tribox Air is now available in Austria. Therefore, you can travel freely **with a single box in 5 major European transit countries.**

BE AUTONOMOUS

The box can be connected through a lighter charger or directly to the battery of your vehicle, it is very simple to install. It can be installed directly in your garage by your teams, **without going through a specialized provider.**

SAVE TIME

Once installed, your Tribbox Air can be fully parameterized remotely thanks to over the air technology. **In a few clicks and without changing your OBU,** you can :

- reaffect a box to another vehicle
- add new services
- add new networks

NO WARRANTY DEPOSIT !

Did you know ? Your tribox Air is given to you for free without prior warranty deposit.

MONITOR YOUR FLEET

Directly integrated in the tribox Air OBU, real-time geolocation, geofencing and point of interest management will allow you to follow your fleet and optimise your journeys. In case of anomaly on a transaction, you are warned in real-time and can therefore react instantly to ensure the quality of your deliveries and thus your customers' satisfaction.

NO NEED FOR AN INTEROPERABLE DEVICE?

No problem, eurotoll can provide you with tailor-made solutions depending on the countries you are targeting (local OBU, eurotoll card, etc).

AND ALWAYS, EUROTOLL ADVANTAGES

SERVICES AVAILABLE IN 16 COUNTRIES

Leader in European toll systems, eurotoll decodes tolls for you and takes into account all the technical and administrative procedures so that you may travel freely [over 92,000 km of toll networks throughout Europe \(motorways, bridges, tunnels, parkings\)](#).

eurotoll means a single provider, a single contact and a single group of invoices to [travel in 16 European countries](#) (France, Spain, Portugal, Belgium, Luxembourg, the Netherlands, Austria, Germany, Denmark, Switzerland, Italy, Poland, Hungary, Czech Republic, Slovakia and Sweden).

OPTIMIZATION OF YOUR TOLL BUDGET

Day after day, eurotoll provides you with all necessary information for the optimization of your toll budget. [Daily consumption tracking, detailed dashboards, alerts in case of anomaly \(TLPC, class anomaly...\)](#) are also at your disposal on your secured user portal. Moreover, our advisors help you on a daily basis in managing your vehicles and identifying any potential optimization of your toll costs.

CUSTOMISED SOLUTIONS

Beyond our standard offer, eurotoll teams can be flexible and work in project mode to implement [personalised solutions interfaced with your systems \(EDI\)](#), so that toll data may be directly integrated to your worktools (TMS, ERP...).
