

## Important update

### Covid-19

Dear customer,

**We wanted to share with you the measures undertaken by eurotoll regarding the Covid-19 outbreak.**

Our Business Continuity Plan (BCP), designed to deal with this type of situation, has been reviewed in order to adapt as best as possible to the evolution of the situation. Our objectives are:

- To protect our employees.
- To maintain activity at the highest possible level.
- To be consistent with the measures established by the government.

**All measures to limit the transmission of the virus have been implemented.** In particular, we remind all our employees that we all must follow the rules of hygiene and precaution, and travelling is restricted or cancelled.

**Rest assured that our organization and tools will enable us to ensure the continuity of our services, even in the event of a containment obligation required by the authorities.** All areas that are fundamental to our customers and suppliers have been given priority attention in the deployment of our means and resources.

**We remain mobilized and attentive to the evolution of the situation in order to adapt, if necessary, our provisions.** If necessary, we will come back to you to send you additional information.

At the same time, our team remains at your disposal to answer all your questions.

Best regards,

eurotoll Customer Service
