

**EUROTOLL JOINS THE TELEPASS AND FAI SERVICE FAMILY
A EUROPEAN CHAMPION OF TRANSPORT SERVICES IS BORN**

Issy-Les-Moulineaux, March 28, 2022 – eurotoll joins the Telepass family and FAI Service, after Abertis has accepted their joined offer for the acquisition of eurotoll. The completion of the transaction will be effective after the legal required procedures have taken place. This operation has an important strategic value for eurotoll, which will further strengthen its position on the European Commercial Road Transport market.

The Telepass Group was founded in 2008 with the vision of creating an integrated system of urban and suburban mobility services: an ecosystem of companies created to give people the possibility of unhindered freedom of movement. Today, Telepass Group companies are committed to extend and guarantee the access to their services in all Europe, in order to transform each travel into a truly limitless experience.

FAI Service was founded in 1986 as an electronic toll operator in the Italian heavy vehicle transport market. Today, it is an ecosystem that offers carriers an extension of services ranging from electronic toll to insurance, from intermodal transport to telematics, from payment services to financial. The group has developed a strong commercial presence in Italy, as well as in the Iberian Peninsula, the Balkans and Eastern Europe.

The combination of the expertise of eurotoll, a leading player in the European Electronic Toll Services market, with those of Telepass and FAI Service, will allow to further expand its products and services portfolio, accelerate innovation and enhance its customer service. The technical and operational cooperation already in place between Telepass and eurotoll since several years will make this union smooth and allow the development of eurotoll, with a never-ending focus on customer satisfaction.

eurotoll - Since 2006, eurotoll has been providing a complete offer dedicated to carriers, including electronic toll services that allow haulers to move freely in Europe, such as on motorways, bridges, tunnels and trucks parking. Historically expert in France, eurotoll has progressively extended its geographical coverage in 16 European countries, with a network of over 92.000 kilometers of tolled roads, and more than 8.000 customers and 150.000 payment solutions (OBUs, cards).
